

DWA_03.5 Knowledge Check_DWA3.2

1. User story(ies) in Gherkin syntax for the "+" button.

As a user , I want the plus symbol to increment the number by one each time it is clicked so that I can keep count of certain events

.

As a user , I want the symbol to have an effect(increase size or even change colour) each time it is clicked to signify that it is clicked.

As a user I want to limit the amount of clicks so that I don't end up incrementing forever.

2. User story(ies) in Gherkin syntax for the "-" button.

As a user, I want the minus button to decrement by the number displayed on the counter by one each time it is clicked so that I can keep track of certain events.

As a user, I want the button to have an effect(increase size or even move a little bit) each time it is clicked to signify that it is clicked.

As a user I want to limit the amount of clicks so that I don't end up decrementing forever.
